

# SENIOR CRUMBS

*Lifetime vitality formula*

**F**eeding and caring for an ageing horse poses quite a few challenges. The general physical condition is slowly deteriorating.

Their overall physical condition deteriorates slowly over time. Sooner or later, you will see weight loss, muscle loss, a duller coat, and difficult shedding. Poor digestion and inefficient absorption of nutrients due to dental problems are also common.

In brief, their energy and nutritional requirements change and they require much more from their ration.

Our new Senior Crumbs is a small pelleted feed (crumble), designed to meet the nutritional needs of horses in their golden years.

It is grain-free, rich in vitamins and helps to maintain good health while the aging horse faces difficulties in chewing and/or a loss of physical condition.

## Unique features!

**GRAIN-FREE FORMULA**  
Highly digestible, rich in fibers and ideal for all horses that benefit from a grain-free diet.

Contains extra omega 3 and 6 fatty acids for a positive effect on the immune system and the coat, and to maintain suppleness and mobility.

Small pelleted feed (crumble) designed to soak to form a mash: easy intake and ready to feed within just 2 minutes!

Balanced levels of vitamins and minerals for optimal health and vitality. With extra B-vitamins and Vit.C.

**LOW starch and sugar**  
A low starch and sugar content and high digestibility. Suitable for horses of all ages that require a diet of reduced starch and sugar.

High quality proteins (12.9%) to support muscle quality and maintain body weight.

# Feeding guideline

It is important to feed a diet and quantity that meets the lifestyle and needs of the horse.

A general guideline for the recommended amount of Senior Crumbs per day: 0.5 kg per 100 kg bodyweight.

Senior Crumbs is designed to soak to form a mash. Just add water (1:1), and it's ready to feed within just 2 minutes. Your senior horse can absorb it easily thanks to its soft structure and high digestibility.

Check out the Senior Crumbs video here!

# Important!

- Divide the daily ration into at least 2-3 meals per day.
- Feeding a good quality forage is the basis of a healthy horse (minimum of 1.5% of your horses' bodyweight per day).
- Fresh drinking water must be available at all times.

We recommend to combine Senior Crumbs with soaked HAVENS Fibre Dice if the horse has troubles to eat traditional roughage. This ensures an intake of extra fibres.

# FIBRE DICE WITH APPLE

- Very tasty nuggets, composed of timothy chaff, alfalfa, dried apple bits.
- Low in starch and sugar and without the addition of molasses, vitamins or cereals.
- Dried with hot air; free of dust and mold.
- Very tasty; ideal for fussy feeders.
- To be soaked with water (1:2). Let it soak for about 15 - 20 minutes

## NUTRITION DATASHEET SENIOR CRUMBS

<b>Nutrient / kg</b>		<b>Essential amino acids (T)</b>		<b>Vitamins (A)</b>		<b>Trace elements (T)</b>	
Energy	10 MJ	Lysin	7 g	Vit. A	22,500 IE	Iron (Fe)	448 mg
