

# EQUIFORCE VENTILATOR+

## SUPPORTS THE AIRWAYS AND IMMUNE SYSTEM

### Dual-acting natural formula

Refreshing supplement with a multiple blend of essential oils (eucalyptus, peppermint, anise, and rosemary), Echinacea purpurea (red sun hat), Ceasalpinia spinosa (tara), and honey. The formula is dual-acting: it soothes and relieves the airways which provides the horse with maximum air but also supports the immune system in a natural way. Very suitable for all horses, but perhaps even more so for sport horses that must be well ventilated to sustain optimum performances and at the same time need to maintain a well-functioning immune system, regardless of travelling, changing environments and climates, stress, exposure to airborne irritants (dust, fungal spores, ammonia, etc.). Administration of Ventilator+ is immediately beneficial for the airways and also provides a valuable support to the immune system on the long run at regular use. Ventilator+ is very applicable for stabled horses due to poorer ventilation than in the open, especially in stables with many horses on a relatively small area, or many replacements /new horses entering the stable.

### Powerful ingredients make the difference

Ventilator+ is composed of more than a handful of active, natural ingredients that all offer excellent support to both the airways and immune system, adding to the well-being of the (sport)horse:

- ✓ Eucalyptus-, peppermint- and anise oil. 3 refreshing essential oils that are well-known for their unique ability to relax and soothe the airways if the airways are challenged by eg. hard exercise or airborne irritants.
- ✓ Echinacea purpurea (red sun hat), an ancient nutraceutical remedy that is well-known for its immune-stimulating properties which are owed to the very high content of polyphenols that are highly important for the body cells ability to protect themselves from oxidative stress and damage.
- ✓ Powerful antioxidants in the form of vitamin C, Ceasalpinia spinosa, and rosemary oil add to the formulas immune-stimulating properties, providing optimum protection of the body cells and supporting cell repair/renewal when the cells are damaged by exercise, stress, environmental factors, and ageing.
- ✓ Honey, a natural sweetener, making the product well accepted by horses. On top of a great taste, honey is also well-known for its anti-bacterial properties.

**Daily dose:** horses: 2 x 20 ml, ponies: 2 x 15 ml. For prevention/maintenance measures: horses: 1 x 20 ml, ponies: 1 x 15 ml. Feed on top of feed ration. Shake can well before use.

**Composition:** glycine, sorbitol syrup, honey, Ceasalpinia spinosa.

**Color:** dark brown

**Analysis:** water: 43,4 %, crude protein: 1,1 %, crude fibre: 0,2 %, crude fat: 6,4 %, crude ash: 1,6 %, sodium(Na): 0,3 %.

**Feed additives per liter:** Nutritional additives: Echinacea purpurea: 50.000 mg, vitamin C(3a300): 30.000 mg, eucalyptus oil CAS 8000-48-4: 20.000 mg, peppermint Oil CAS 8006-90-4: 20.000 mg, anise oil CAS 84775-42-8: 1.000 mg.

Emulsifier/stabilizer: citric acid (1a330): 1.500 mg.

Preservation/antioxidant: rosemary oil CAS 8000-25-7: 1000 mg.

|                     | per 40 ml | per 20 ml |
|---------------------|-----------|-----------|
| Echinacea purpurea  | 2.000 mg  | 1.000 mg  |
| Vitamin C           | 1.200 mg  | 600 mg    |
| Eucalyptus oil      | 800 mg    | 400 mg    |
| Peppermint oil      | 800 mg    | 400 mg    |
| Ceasalpinia spinosa | 100 mg    | 50 mg     |
| Anise oil           | 40 mg     | 20 mg     |
| Rosemary oil        | 40 mg     | 20 mg     |

**Feed category:** Complementary feed for horses.

**Note:** Contains no substances prohibited by the FEI or The British Jockey Club.

**Storage:** In closed can, away from heat and sunlight.

**Shelf life:** 24 months

**Packaging:** 1 liter can (twin neck)
